Import the new PRGS screening terms

There is a new screening term used to record whether the patient is currently pregnant and if so, their date of LMP and EDD. If you already have the “PRGS” screening term installed, you can skip this step.

If not

1. Click on File
2. Click on Options
3. Click on Recall/Screening
4. Click on Screening Terms
5. Click on Actions
6. Click Import Disc

Locate the file “PRGS Pregnancy Status.mtd” within the files that you extracted in step 2 above and then “Open”.

You should get the message “Screening retrieved from disk”.

Import the ZDEP Screening Terms

There is a new screening term used to record whether the PHQ2 answers. If you already have the “ZDEP” screening term installed (or another screening term you use to record the PHQ2 outcome), you can skip this step.

1. Click on File
2. Click on Options
3. Click on Recall/Screening
4. Click on Screening Terms
5. Click on Actions
6. Click on Import Disk

Locate the file “ZDEP PHQ2 Screening.mtd” within the files that you extracted and then “Open”. You should get the message “Screening retrieved from disk”

7. Click Open. You should get the message “Screening retrieved from disk”.

Import the new advanced form:

1. Click on File
2. Click on Options
3. Click on Advanced Forms
4. Click on Advanced Forms Manager
5. Click on Action
6. Click on Import Form

Browse to locate the file “Best Start Pregnancy.xml” that you extracted in step 2, and then “Open”.

7. Click on Validate
8. Click on Import

Check the concepts

The form relies on a few concepts being correctly mapped, users should check that the following concepts are mapped to the screening terms that you use at your practice.

1. Click on File
2. Click on Options
3. Click on Advanced Forms
